Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-33 and 39-40, drawn to a method and apparatus of a speaker device ,
classified in class 381, subclass 191.
 - II. Claims 34-38, drawn to a method for generating parametric audio output based on
interaction of multiple ultrasonic output within air as a nonlinear medium,
classified in class 381, subclass 111.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the method and/or apparatus for constructing an electrostatic speaker device does not require the step of generating an electronic signal that comprises at least two ultrasonic signals having a difference in value which falls within an audio frequency range. The subcombination has separate utility such as generating an electronic signal that comprises at least two ultrasonic signals having a difference in value which falls within an audio frequency range and mechanically emitting the at least two ultrasonic signals from the diaphragm into air.

Art Unit: 2643

3. Because these inventions are distinct for the reasons given above, the search required for Group I is not required for Group II, have acquired a separate status in the art because of their recognized divergent subject matter, and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Vaughn North on July 7, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUYEN D. LE whose telephone number is (703) 305-4844. The examiner can normally be reached on 9:30AM-6:00PM.
